

## Message from Siena Pediatrics 1-1-2024

From the Providers and Staff at Siena Pediatrics.

We thank all our families and their children for being a part of Siena Pediatrics and providing us the opportunity to provide your family with pediatric care for sick and well visits.

Looking forward, we have brought on several new providers (Dr Spencer Calles, Dr Beatrice Macfu, Nichole Cash NP) who are board certified and excellent pediatric providers. Of course, we have Dr Carrie, Dr Shawn and Matt Padgett PA who round out our team. In addition to providing a full complement of pediatric services, we also address mental health issues and urgent care matters.

We have added more providers to have more same day sick visits available, in addition to our scheduled well visits. We are in the process of extending our hours of operation and having limited weekend availability.

Our new providers are very timely and very attentive to your child's needs and concerns. We ask that our families be 10 minutes ahead of scheduled time to minimize any delays in seeing your child.

Please be patient with us as we start the new year, and we need to navigate through all the additional information, demographics, and insurance update. This is a requirement from all insurance providers, and it is to protect you from unnecessary charges.

We are increasing automation with improved electronic medical records, portal access, and incorporating AI technology.

We are locally owned and operated since 2006 with over 20,000 patients. We continue to advance Siena Pediatrics with a Servant's Heart and Owner mind to not only improve the quality of pediatric care in Las Vegas and Henderson, but also make it aesthetically pleasing and fun for the child.

Thank you again from the bottom of our heart.

Carrie Wijesinghe MD
