

Pre-Circumcision Procedure Instructions

Your son is scheduled to have a circumcision. This is an elective procedure. In order to make his and your experience optimal, please follow the procedures listed below:

1. Arrive 10 minutes early for your appointment.
2. Bring formula, breast milk and a blanket for him, if not fed during the procedure.
3. Be prepared to feed him after the procedure is finished.
4. Read and follow the after care instructions you are given.
5. Purchase infant Tylenol/acetaminophen drops in case he needs it for pain afterwards. **His dose is 0.4 ml=1/2 dropper every 4 hours.**

We will call you the night before to confirm the appointment. Please be sure that we have a phone number at which we can reach you or leave you a message that you will check.

If you cannot keep your appointment, you will need to provide us with 24 hour notice by phone or you will be charged a no show fee. That fee is charged to you and NOT you're insurance.

Thank you for your cooperation.
